ABOUT ME

I am a passionate Full Stack Developer, love both front and back end. I am someone very meticulous, organized and willing to work as a team, I am in constant search of personal and professional development and, currently, I am looking for a project that I am passionate about and that helps me fulfill and continue learning and improving my skills.

PROJECTS

MovieMark

Third project for the Henry Bootcamp, with my team of 5 people, we developed a web app to administrate a cinema. It has panel admin, login, payment checkout, and other great additions. The technologies used were: React.js, Redux, Node.js, Express, Sequelize, PostgreSQL and SASS, and some other technologies.

Dog App

Second project carried out for the Henry bootcamp, in which you can search for dog breeds by name, see all breed details and also add your own dog breed! The technologies used were: React.js, Redux, Node.js, Express, Sequelize and PostgreSQL

Food App

First project carried out for the Henry bootcamp, in which you can search for recipes by name, see all recipes details and also add your recipes! The technologies used were: React.js, Redux, Node.js, Express, Sequelize and PostgreSQL
